

# Types of attributes and methods of the class TransactionAnalyzer

## Notation

- $I$  denotes the number of items.
- $C$  denotes the number of separate categories associated with the items.
- $V_c$  denotes the number of separate values in the category  $c$ .
- $N$  denotes the number of nodes.
- $P$  denotes the number of patterns.
- $Y$  denotes the number of years for which transactions exist.
- $J$  denotes the number of itemsets.
- $+$  denotes public attributes and methods (i.e., exported attributes and methods).
- $-$  denotes private attributes and methods (i.e., non-exported attributes and methods).
