# Types of attributes and methods of the class TransactionAnalyzer

## **Notation**

- *I* denotes the number of items.
- *C* denotes the number of separate categories associated with the items.
- $V_c$  denotes the number of separate values in the category c.
- *N* denotes the number of nodes.
- *P* denotes the number of patterns.
- Y denotes the number of years for which transactions exist.
- *J* denotes the number of itemsets.
- + denotes public attributes and methods (i.e. exported attributes and methods).
- — denotes private attributes and methods (i.e. non-exported attributes and methods).
